

Looking out for quality and affordability: Replacement windows in Toronto and GTA

Whether a homeowner is considering replacement windows due to breaks, age, energy efficiency or simply a home renovation to give an old house a well deserved makeover, a custom designed window replacement is the simple renovation answer. Having replacement windows built and installed by Torwin Windows & Doors, a Toronto and surrounding area replacement windows company, is an affordable and unique way to change the exterior of a home, with little overall renovation work. When choosing the type of replacement windows for a home, there is an extended variety of replacement window options to suit any design preference and budget. By researching the type, and then materials used to construct replacement windows, ideas for the look and feel for a new window can be achieved.

Replacement windows in Toronto with quality in mind

There are many types of replacement windows from single hung, awnings, greenhouse and single sliders. [Replacement windows](#) can be made in a variety of material:

- Vinyl Frame- The benefits of vinyl frame replacement windows is improved longevity. This is due to welding, using the latest technology, which heats the vinyl and pressure fits the members together. Vinyl frame replacement windows have a triple weather seal, and warm edge spacers, saving energy costs. A full screen with overlapping frames will increase ventilation, and keep insects out.
- Extruded Aluminum Clad- These beautiful replacement windows have a pine interior with other species available. Extruded Aluminum clad replacement windows allow the unique customizable option of painting or staining the interior frame to suit preferences. The replacement windows will also feature the warm space heaters, which are composed of polymer foam, oppose to metal. This saves energy costs by absorbing moisture, reducing condensation, and the transfer of heat.
- Wood In & Out- replacement windows with wood in & out can come in stain or paint grade, for customizing the interior or exterior of the wood window frame. For older houses requiring replacement windows, or homeowners charmed by the antique look, wood in & out replacement windows can replicate century old houses with rails and stiles. Strength in this frame type is created by using mortise and tendon joints. This creates an interlocking connection, allowing for a very strong hold that is built to last.

Whether the home would suit bay or bow, shutters or double slider replacement windows, the materials they are made from will create a unique and custom finished look, which will bring an old house back to life, or make a newly purchased house feel like home.
